Monthly on Thursdays at:

Cedar Park Church

What You Haven't Been Told About Dinosaurs

Thurs April 16th at 7PM

Description: Brian Thomas presents little-known but critical observations about dinosaurs, gleaned from science and Scripture. He presents solid answers to the biggest dinosaur questions, including how the fossil and historical evidence of dinosaurs and dragons fits so well with Noah's Flood.

About the Speaker: Brian Thomas received his bachelor's degree in biology from Stephen F. Austin State University, Nacogdoches, Texas, in 1993. After teaching at Angelina Christian School and beginning graduate studies in science education at the Institute for Creation Research Graduate School, he returned to Stephen F. Austin, where he earned a master's degree in biotechnology in 1999. From 2000 to 2005, he taught 9th and 12th grade biology at Ovilla Christian School in Ovilla, Texas, as well as biology and chemistry as an adjunct professor at Navarro College in Waxahachie, Texas. He taught biology, chemistry, and anatomy as an assistant professor at Dallas Baptist University from 2005 until 2008. Mr. Thomas is the Science Writer at the [Institute for Creation Research](http://www.icr.org), where he is responsible for contributing news and magazine articles, editing, and speaking on creation issues.

The Apologetics Symposium will occur on the 3rd Thursday each month, and feature multimedia presentations by speakers, scientists, and authors who are dedicated to defending the Bible against naturalism. The events are free and open to the public and generally suitable for ages 11 and up. Educational resources will be available for sale from the NW Creation Network.

16300 112th Ave NE Bothell, WA 98011
